The Black Arm Complete

The Black arm is a 3-axis dampening system with an additionally needed vibration mount for stabilizing roll and tilt errors as well as vertical motion and vibrations. The Black arm is a hardmount system, made for gimbals, that you want to mount on vehicles such as cars, ATVs, boats, snowmobiles etc.

Tranquilizer

The Flowcine Tranquilizer is the next generation of vibration isolators, specifically designed around the geometry of an electronic gimbal device. Shores 30 + 40 are included.
